PROJECTS

ToDo List Website

React, Bootstrap

This is a very common todo list website that have title and description these have some features like Add in To Do , Delete the todo, and modify the todo . I also implement the concept of Local Storage the store the todo.

Barber Website

HTML, CSS, Bootstrap

A website for Barber that have a online presence .This includes there work, open close timing and make for an appointment. (This have only frontend part)

E-Commerce Website

React, Bootstrap

A fully responsive e-commerce website that is 80% similar to Myntra it has all functionalities as like other e-commerce. We can add product in cart, delete product and it has also a wishlist option.
